Info

Along with Puck, named after the water spirit of European folklore, Nix is the second ultra-compact knife. The difference lies in the details that determine how it is used and how convenient it is for the user. The Nix lacks the usual flipper; it opens with the help of a front flipper or from the hole in the blade. The front of the handle and the notch on the blade, when opened, form a wide groove, allows a good grip close to the blade, very convenient for small and precise work.
